

There is a table contains id, name and manager id. You have to find out Employee name and their manager name.

Given table :

| Id | Name | Manager-Id |
|----|-------|------------|
| 1 | Bob | |
| 2 | Betty | 1 |
| 3 | Tara | 1 |
| 4 | John | 2 |
| 5 | Mike | |

Output table :

| Id | Name | Manager Name |
|----|-------|--------------|
| 1 | Bob | |
| 2 | Betty | Bob |
| 3 | Tara | Bob |
| 4 | John | Betty |
| 5 | Mike | |
